PROFESSIONAL SUMMARY

Dedicated Senior Software Developer with extensive experience in Python and JavaScript, leveraging a strong background in AI and software engineering from top-tier organizations including OpenAI, Nvidia, and Meta. Proven ability to develop robust software solutions and drive innovation in high-paced environments.

SKILLS

- Python
- JavaScript
- Software Development
- AI Integration
- Problem Solving

WORK HISTORY

June 2021 - Present
Software Developer
OpenAI

- Contributed to the development of cutting-edge AI models that improved performance by 30%.
- Collaborated with cross-functional teams to enhance software functionality and user experience.

January 2019 - May 2021
Software Engineer
Nvidia

- Designed and implemented software solutions that optimized GPU performance, resulting in a 25% speed increase.
- Worked on innovative projects that received recognition in tech conferences.

August 2017 - December 2018
Full Stack Developer
Meta

- Developed scalable web applications used by millions of users, enhancing overall engagement.
- Led a team initiative to refactor legacy code, improving system maintainability and performance.

EDUCATION

2017
Bachelor of Science in Computer Science: Massachusetts Institute of Technology (MIT)

2019
Master of Science in Software Engineering: Harvard University
